

VLADYSLAV HONTAR

SOFTWARE ENGINEER/SOLANA BLOCKCHAIN DEVELOPER

+353830806274

HONTARVLADIE@GMAIL.COM

ATHLONE, IRELAND

<https://vladyslavhontar.github.io/portfolio/>

SKILLS

Programming languages: Java (Spring), Rust, JavaScript (basic), TypeScript (basic), C++ (Arduino level)

Blockchain: Solana, Anchor

Tools: Git, Linux, Docker, Message Brokers, AWS SM, MySql, Postgres

EXPERIENCE

Aug 2025-ongoing

Software Engineer (blockchain), Inbound Sales
Osambit (remote)

Acted as a technical consultant for clients, gathering requirements, designing scalable infrastructure architectures, and estimating project timelines. Authored technical architectural designs using PlantUML (PUMML) during RFQ/design phases, streamlining cross-functional understanding of complex distributed systems.

Designed and maintained high-performance automation infrastructure for DeFi/MEV strategies, ensuring low-latency execution and high system reliability.

Optimized system communication by migrating from AWS SQS to ZeroMQ for inter-service messaging, achieving significant latency reduction for local execution.

Managed deployment workflows using GitLab CI pipelines and collaborated in an Agile environment using Jira for sprint planning and story point estimation.

May 2024-Sept 2025

Solana Blockchain Developer, Rust
EQUI Labs (startup)

Developed backend, indexer, worked on architecture and provided innovative ideas into the project. Developed Solana programs with Anchor, worked with CPIs, optimized programs to use less CUs making the cost of the transactions cheaper.

May 2021- March 2022

Hardware engineer -> Service Center Coordinator
SKLO

Carrying out detailed repairs on iPhone screens, slicing screens and replacing screen parts (backlight, touchscreens, touch IC). Soldering of touchscreen soldering pads.

Coordinated repair tasks, managed inventory and parts issuance, tracked repair costs and maintained technical documentation (position ended due to forced relocation)

PROJECTS

Q1 2026	DEX (Solidity) Developed DLMM DEX (decentralized exchange) for Robinhood testnet chain
Q1 2025	Solana aggregator (Rust) Swap tokens website with own indexer, routing system and arb redistribution to the user creating arb opportunities. Integrated wallet. https://swap.equilabs.io/swap (support stopped)
Q2 2024 – Q1 2026	Solana arb (TS -> Rust) Monitors blockchain for arb opportunities and executes transactions if an opportunity exists
Q3 2024 – Q1 2025	AI assistant on esp32 (C++) Talk to a small watch-size device and get displayed responses
Q3 2024	Seefood (android app from Silicon Valley series) (Java) Take a picture of a dish to get “hotdog” or “not hotdog” ...

EDUCATION

2026-2027	Masters Degree in Software Design with AI for Cloud Computing Technological University of the Shannon (Ireland)
2025-2026	Honours Bachelor Degree in Software Design with AI for Cloud Computing Technological University of the Shannon (Ireland)
2022-2025	Ordinary Bachelor’s Degree in Computer Engineering Technological University of the Shannon (Ireland)
2019-2023	Higher Certificate in Network Technologies and Telecommunications Kyiv College of Communication (Ukraine)

CERTIFICATIONS

- *Google* Manage PostgreSQL Databases on Cloud SQL, Insights from Data with BigQuery, Share Data using Google Cloud, Exploring Data with Looker, Project Manager
- *Cisco* Network Academy
- *Technological University of the Shannon* Presentational skills
